- > Software development project management
- > Training and consulting services

Whether you are willing to expand your existing development team with skilled professionals or want to build your solution from scratch, we offer professional services to strengthen your R&D and fuel continuous innovation for your business.

Our approach

Advanced Web-Frontends

We use advanced web development frameworks to create high-quality solutions, striving to improve productivity and cut operating costs for our customers.

Portable Mobile Apps

Applying the latest toolkits, we create reliable cross-platform mobile apps with one code base. This approach looks and works equally well on all devices and operating systems.

Configuration Management with DevOps

Our smart and agile DevOps approach helps to save up to 90% of effort on deployment and server support. It enables stable and predictable software development, testing, and release.

Collaboration models

R&D Team Extension

Your goals

Strengthen own R&D capabilities with skilled professionals without hiring staff

Your benefits

Reducing development budget up to 50% with remote developers and dedicated PMs.

Your costs

Time and material

Dedicated Team

Staff a project with qualified developers and expertise in various technologies

a single dedicated team helps to save up to 75% of costs on projects with more than a 12 months' development cycle

Our customers

“The open architecture concept of K&C has made effective implementation possible in this intricate field by introducing a variety of distribution channels, technical surroundings, and great cooperation partners, while reducing maintenance costs simultaneously. Besides, K&C has successfully supported us in all project phases with its high professionalism and technological competency.”

Thomas Waldherr
Project Manager

About Us

IPNET is an international software development company with Competence centers in Munich (Headquarters, IT Consulting), Kraków & Kiev (both are web development-oriented R&D centers), and Prague (embedded technology development).

“Owing to our considerable work experience and a core strategy (Best people – Best technology – Best results), we are able to meet our clients’ needs in the most efficient way.”
